

AI-NATIVE MICRO-CINEMA

LOVE BEYOND PLANETS

THE UNIVERSE KEEPS FALLING IN LOVE.
Love is the signal no planet can contain.

MEDIA ONE-SHEET / AUGUST 2026

THE PREMISE

Six unfamiliar beings, shaped by six impossible worlds, discover that love begins when one being learns what matters in another being's world.

FORMAT	15-second episodes
PLAN	18 episodes
RELEASED	11 episodes
GENRE	Sci-fi / romance

SIX WORLDS. SIX WAYS TO CARE.

● MAR MARS Saves what is rare.	● JUPI JUPITER Becomes shelter.	● SATI SATURN Lowers a barrier.
● URA URANUS Sees another way.	● NEPH NEPTUNE Answers slowly.	● PLU PLUTO Keeps waiting.

WHY IT IS DISTINCT

Most AI films ask synthetic humans to look real. Love Beyond Planets turns the limitation into a visual language: deliberately strange bodies whose awkward choices feel emotionally familiar. Every episode has room for one world, one action, and one emotional turn.

PRODUCTION APPROACH

AI-native imagery and motion with human-led story development, shot selection, sequencing, editing, and sound direction.

EDITORIAL / COLLABORATION FIT

AI cinema, vertical storytelling, creature design, worldbuilding, animation, sound design, science fiction, and serialized micro-film.
